

# Edge Flash Grinder

Contact Edge for  
more information

The Edge Band Saw Blade Flash Grinder is designed to remove flashing from the welding process. The design of the machine provides the user with a highly productive and flexible removal of flash. The flash grinder uses an abrasive belt mounted on a rubber wheel to reduce consumable expenses. The flash grinder also has a 15" vertical adjustment to allow operators to adjust the height to their comfort.

## Specifications:

- 1/3 hp, 1725 RPM Grinding Motor
- 8" balanced rubber wheel for grinding belts
- 15" vertical grinding height adjustment
- Clear grinding guard to protect operator from debris
- Fluorescent work light
- Ready to hook up to a dust collection system
- Electric: 120 or 240 VAC, single phase

## Replacement Parts:

- 800300 Abrasive Belts
- 800301 Rubber Wheel

Made in  
the USA
